Has this workshop inspired you to find out more about semiconductors?

46 responses

Participant Feedback

"Tutorials well explained, I LOVE Real examples, REAL live demos, this is a real workshop"

"The workshop helped me understand the amazing world of semiconductors, it motivated me to learn more about it"

"The whole workshop was very entertaining and I learned a lot. The atmosphere was great fun."

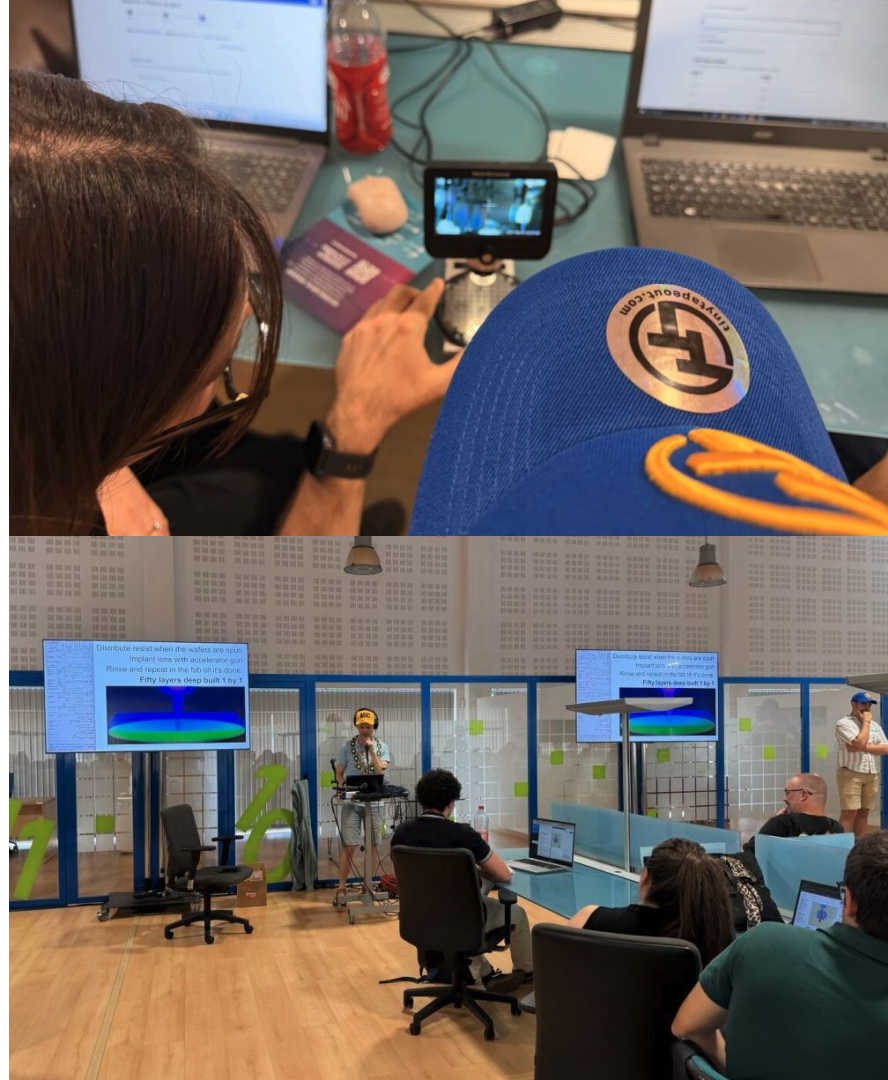

"It combines perfectly learning and having a good time (I really enjoy the rap)."

"What I loved most about the workshop was how different it was. Since this field is so unique and isolated, it really helped bring his passion to everyone through humor and his expertise. I really liked how he helped us memorize things using rap and how approachable he was. I'm glad that the meal was such a simple way to connect with my classmates, since I often feel very alone in this field."

"Very funny and interesting project! For sure I will try to go deeper!"

"El carisma de Matt"

"Amazing"
